---

My name is **Danil Zakablukovskii**, I live and study in Berlin and have Student visa (I wouldn't mind to change it to a blue card :).

I'm a full-stack developer (more backend than frontend).

I'm from Russia and **I'm not an EU citizen** yet.

- 5+ years of experience
- 3.500+ worked hours on Upwork (and 100% Job Success!)
- Contributing in open-source projects (like Yii2)

My main tech stack is:

## **Backend:**

PHP (PHP7 too ofc), node.js, Yii/Yii2, Laravel, Redis, MySQL, PostgreSQL

## **Frontend (I'm not as good at it as in backend):**

HTML (HTML5), JS (es6), CSS (SCSS, Less), jQuery, learning React/Redux, Grunt/Gulp/Webpack..., packet managers (npm, bower, ...)

## **Server/Sysop:**

Linux, Ansible, have some good experience in MySQL, Sphinx, nginx, Apache configuration

## **Other:**

Websocket, Git, API building/integration experience, social services integration (FB, Twitter, Google/YouTube, SoundCloud, etc), a bit of Ruby/Python/Java

---

## **Employment:**

- [Spinitron](#), spring 2015 - present  
Autocomplete (Sphinx + iTunes and Musicbrainz databases), high availability, still in development, so this description will be updated later.
- [Tronic.fm](#), spring 2014 - spring 2015  
Image processing, whole bunch of social services related work (crawlers, api usage, content creation and obtaining), Overture/FB/Resident Advisor tight Events and RSVP's integration.
- [Medvedev Marketing](#), summer 2012 - autumn 2013

## **Education:**

- HTW Berlin, spring 2015 - Present, Computer Science
- ISU Irkutsk, 2010 - 2012, Computer Science

## **Languages:**

- Russian - native speaker
- English - Upper-Intermediate

- German - Upper-Intermediate

**Other:**

I love (<3) reading, there are some favorite IT-related books I have (real paper!):

- “Code Complete”
- “The Pragmatic Programmer: From Journeyman to Master”
- “Introduction to Algorithms” (ha-ha, who am I kidding?)

Also I like to create and mix music (but actually didn't do anything real yet).

I really like studying, new knowledge, interesting and difficult things/tasks.

Mathematics, Physic, Biology, Astronomy - these branches of science have always interested me, so in my alternative life I would become a Biological Engineer or something like that.
