

Resume

TODO: check grammar and other things

My name is Danil Zakablukovskii,

I'm a full-stack developer (more backend than frontend).

- 5+ years of experience
- 3.500+ worked hours on Upwork (and 100% Job Success!)
- Contributing in open-source projects (like Yii2)

My main tech stack is:

Backend:

PHP (should I write PHP7 here now?), node.js, Yii/Yii2, Laravel, Redis, MySQL, PostgreSQL, Websockets

Frontend (I'm not as good at it as in backend):

HTML (HTML5), JS (es6), CSS (SCSS, Less), jQuery, learning Ansible2 (or React/Redux, I'm not ever sure yet), Grunt, Bower

Server/Sysop:

Linux, Ansible, MySQL (configuration), Sphinx, nginx, Apache

Other:

Git, Grunt, Bower, API (usage and creation), social services integration (FB, Twitter, Google/YouTube, SoundCloud, etc), Ruby + RoR (junior-level)

Employment:

- **Spinitron**, spring 2015 - present
Autocomplete (Sphinx + iTunes and Musicbrainz databases), high availability.
- **Tronic.fm**, spring 2014 - spring 2015
Image processing, whole bunch of social services related work (crawlers, api usage, content creation and obtaining), Overture/FB/Resident Advisor tight Events and RSVP's integration.
- **Medvedev Marketing**, summer 2012 - autumn 2013

Education:

- HTW Berlin, spring 2015 - Present, Computer Science
- ISU Irkutsk, 2010 - 2012, Computer Science

Languages:

- Russian - native speaker
- English - Upper-Intermediate
- German - Upper-Intermediate

Other:

I love (<3) reading, there are some favorite IT-related books I have (real paper!):

- “Code Complete”
- “The Pragmatic Programmer: From Journeyman to Master”
- “Introduction to Algorithms” (ha-ha, who am I kidding?)

Also I like to create and mix music (but actually didn't do anything real yet).

I really like studying, new knowledge, interesting and difficult things/tasks.

Mathematics, Physic, Biology, Astronomy - these branches of science have always interested me, so in my alternative life I would become a Biological Engineer or something like that.
